

Universal Label Technologies

The Barcode Specialists

WE NEED A TAMPER EVIDENT ADHESIVE FOR OUR ASSET TRACKING - DOES ULT SUPPLY THIS TYPE OF MATERIAL?

"YES WE DO!!!"

- Manufactured from **tough polyester** this material is ideal for discouraging any form of **tampering** with **assets** or products.
- If any attempt is made to remove or transfer the label, the word **'void'** will appear on both the surface of the product and the label itself thereby preventing re-use e.g. protection against **warranty fraud**.
- Labels can be **over-laminated** to provide complete print protection. This is essential where **durability** is a requirement e.g. protection against cleaning fluid, damp environment, outside use or constant wiping.
- Labels can be **bar coded** or **sequentially numbered** which makes them ideal for tracking products during manufacture or for **asset identification** within your organization e.g. computers, laptops, printers, projectors, instruments & any other equipment that may require identification.
- Prices are available for **small requirements** (500 & 1000) right through to much **larger runs** (100k, 250k & 500k).
- Labels can be **customized** with your name or company logo and details adding color and identification to your product.
